The LAA Conditions of Sale are also displayed in Kivells market office. Clauses 12 to 19 inclusive relate mainly to the Purchaser. This catalogue may also contain reference to Warranties as defined by the LAA Conditions of Sale. Warranty issues will not be considered if payment in full has not been received.

Risk - All livestock are at the risk of the Vendor before they are sold and at the risk of the Buyer when they are sold (fall of the hammer). It is strongly advised that Vendors and Buyers ensure that their insurance policies cover livestock at market premises and that Buyers have immediate cover for animals purchased.

All Lots are sold under the Livestock Auctioneers Association Conditions of Sale as referred to above to include the following two clauses:

Statements of Fact - Unless otherwise announced all statements of fact made in any sale catalogue or at the time of sale regarding the breeding of any animal, its health status or other tests carried out on any animal are statements of fact made by the Vendor and not the Auctioneer and the Auctioneer accepts no responsibility for any misstatement nor does he nor the Vendor accept any responsibility for any subsequent reaction by an animal sold to any relevant test administered after the sale.

Liability of The Auctioneer - The Auctioneer acts in all respects only as agent for the Vendor and no warranty is given by the Auctioneer or his employees or contractors, and none shall be implied, as to title, description or the quality of any Lot. Continuation of herd dispersal.

The cows currently have a 305 day yield of 9886 litres with the bulk tank averaging 4.4 butterfat and 3.47 protein, 148 scc and 21 bactoscan for October. The cows have been housed overnight through the summer for the first time this year and have been grazed by day.

The cows are fed a base ration in the parlour and then are fed to yield in the out of parlour feeders. All rations are rolled and milled on-farm. Forage is fed in square feeders 50:50 maize and silage - no tmr. Youngstock and cows are housed in cubicles. Free of BVD and IBR and monitor the status yearly. They monitor Johnnes and have only ever had one clinical case on the farm, we follow stringent protocols to minimise any risk and calves are reared on powder.

W.F PARSONS & SON
WEST YEOMADON, PYWORTHY, HOLSWORTHY, DEVON, EX22 6SH

Kivells are pleased to have received instructions on behalf of the Parsons family to disperse their dairy herd as they calve. For nearly 100 years the Parsons family have milked at West Yeomadon with Andrew taking over the running of the dairy in 1991. In 2006, Andrew's son Mark came home to work on the farm and both Mark and Andrew have farmed in partnership ever since. The herd is run on a grass based, low input system consisting of silage fed in troughs and cake in the parlour. The herd calves all year round and this first consignment consists of the spring and summer calving portion. The breeding policy has always been to produce strong, well-balanced cows with excellent legs and feet which are capable of producing good volumes of high quality milk. The herd is BVD, IBR and Lepto vaccinated and Johnes screened. The herd is averaging 8219Kgs 4.36%BF 3.43%PTN with a whole herd scc of just cc124.
