Foreword

Kivells are delighted to have received instructions to disperse the Milking & In Calf Heifer portion of the "Ardingly" herd of 453 Pedigree Holsteins on behalf of Messrs D Goodwin & Sons of Hill House Farm, Haywards Heath, West Sussex. The herd is being removed to Exeter Livestock Centre on Tuesday 3rd September for convenience of Sale.

The herd was established by Daniel Goodwin in 1962 before being registered Pedigree in June 2013 with the prefix 'Ardingly'. Over the years the family dairy business grew under the stewardship of William and James Goodwin. The focus has been to breed functional cows with deep bodies, good legs and feet and correct udders, capable of producing large quantities of milk. The farm has supplied Sainsbury's since the inception of the SDDG 18 years ago.

The decision to cease milk production has been difficult for William and James. However, faced with increased environmental costs and changes to land availability, the family has decided this is the right time. The family would also like to extend their thanks especially to Adrian Matthews and Stuart Nicholls from Savills who have advised the family over many years, also to Ben Watts from Kite consulting and to Ben Brearley our vet who has looked after our herd so diligently.

The Sale comprises:

419 In Milk and/or Dry Cows & Heifers & 34 In Calf Heifers. The Cows & Heifers too close to calving to come to the Sale will remain on the farm and be calved with a final Sale of approximately 80 Fresh Calvers will be held at Exeter on **Friday 25th October.**

Management and Feeding

Cow health and Welfare are at the heart of this business. There are weekly routine vet visits and monthly hoof trimmer visits. The herd is scored for mobility monthly. The cows are fed a TMR ration. Ben Watts from Kite Consulting has been our nutritionist and dairy consultant for several years. The cows have been milked 3 times a day for the last 20 yrs however, in the last month this has been reduced to twice a day milking due to staff constraints. The cows are housed 365 days. DIY AI is used. All heifers along with 1st and 2nd calvers plus any selected cows are served with Holstein sexed semen. The remainder are served with Aberdeen Angus or Belgian Blue

NMR Herd Average

The current NMR herd average is:

10,686kgs, 3.62% BF, 3.15% Protein

The average cell count for the Cows in the Sale is 168

Herd Age

There are 153 milking heifers, 112 second, 71 third, 46 fourth, 29 fifth and 7 sixth plus calvers which demonstrates the longevity of the herd.

Calving Pattern

The herd is all year-round calving with the following pattern:

April-May (78), June (36), July-August (98), October (19 inc 10 Heifers), November-December (90 inc 24 Heifers), January-February (68) & March-April (46).

Herd Health

The herd is in a TB4 area, the most recent test was on 2nd July 2024.

The herd is closely monitored for Johnes through quarterly milk testing. In terms of BVD, all calves are tag and tested with no virus positive animals detected. All breeding animals are also vaccinated for BVD. The herd is negative for Leptospirosis based on bulk milk testing and vaccinated annually against IBR. Any abortions are monitored and no positive cases of Neospora have been identified. Health and performance are closely monitored using Dairycomp 305 and regular annual 'external vet' visits through the Sainsbury's milk scheme have guided herd improvements.

Auctioneers Comments

The Ardingly Dispersal is an excellent herd of Cows, they are medium sized with excellent udders and will suit any system whether it be intensive or grazing. The herd had has very recently been TB tested and remains in a TB4 area. With so few Dispersals on the market now, attendance to this sale is thoroughly recommended.

Kivells

Kite Consulting have been working with the Goodwin Family for some considerable time. The herd has been managed carefully under the jurisdiction of the Sainsbury's contract, ensuring the highest standards of animal health and welfare. This is a very productive dairy herd, and there is further scope and latent potential.

Genetically the herd is superior to many, in the Top 1% of herds by PLI, Enviro Cow Index, and PTA's for Kgs of Fat, Protein and SCC. These genetics will suit many systems, especially those looking for great productive performance and high solids – being in the Top 15% for % Protein and SCC, and the Top 25% for Butterfat %.

The herd is also very fertile, with Pregnancy Rates well in to >30%, in the top 10% for Lifespan, and the top 20% on fertility Index.
