## Foreword

Kivells are delighted to have received instructions from Messrs RG Nash & Sons of Brighthams Farm, Horsham, West Sussex to disperse their super Dairy herd which is being removed to Exeter Livestock Centre for convenience of Sale.

The dairy herd at Brighthams farm has been a lifetimes passion for 3 generations of the Nash family, a work in progress of breeding and selecting the best cows and the best bulls of the times. The herd took on pedigree status in the 1980's and registrations continued up until 2018.

In the recent era Philip Nash took over milking and managing the herd in 2002 and his brother Jonathon joined the business in 2010. During this time there has been tremendous change, from 2 small herds on adjacent farms, processing and marketing our own brand and bottles with our parents, to moving together to form a larger herd and then the building of new milking facilities and cow housing in 2003.

We've always put a huge emphasis on breeding robust cows with capacity and with the body, legs and udders to support large yields and a long life. Always using the best genetics for the traits we value, without deviating, to keep improving and supporting a low maintenance but high producing dairy cow.

A big decision was made in 2018 to move away from pedigree status and use that financial resource to go genomic testing for all our youngstock. This invited controversy, but we felt this was the best way forward to accelerated improvement in our herd, using the latest technology to assist our goals. We're proud of that step we took and believe wholeheartedly that the evidence and hard work will be seen on sale day.

The system is based on a 2x milking routine, all year-round calving herd, producing close to 11,000 litres using as much high quality home grown forage and cereals as possible. Milk is contracted to Muller and Brighthams has been aligned with Sainsburys since the beginning of the SDDG in 2007. Our cows are housed on deep bed sand cubicles and feeding routine is purely TMR in 2 groups based on age. We use only sexed Holstien genetics from Genus and Angus semen, with a large proportion compatible with the Gamechanger system.

The decision to sell our herd of dairy cows has been very hard, but we're excited that their future and genetics will live on in herds on other farms. The past 23 years has been a hugely happy time for our family and our cows have played a large part in everyday life. They have cultivated such passion and drive throughout our family and our team members, what a privilege it is to live and work on a dairy farm and what an industry to be a part of.

We've had huge professional support over the years, not least from Jack White and previously Robbie Taylor for our nutritional and feed advice, Maarten Boers from the Livestock Partnership Ltd looking after all our herd health, treatments and future planning and Ian Ohnstad, from The Dairy Group, who helped us develop our dairy in 2003 and continues to advise and help with milk quality and much more. Without these people, we couldn't have succeeded in what we do, huge thanks to you all.

Finally Jonny and I would like to thank all of our team at Brighthams who we work alongside daily and who have done throughout the years. Without your dedication and hard work, we wouldn't be here today. As with any farm and dairy team, we've shared much of our lives together and we will be forever grateful for you all going above and beyond time and again.

Thank you so much.

**Phil & Jonny Nash**

## **Vets Comments**

As a vet I have dealt with the herd at Brighthams farm/ Brighthams' herd for several years. In my opinion this herd has been managed well and as a result it has always achieved good performance figures. Infectious diseases like BVD, Leptospirosis and Johne's disease have been well controlled. Mastitis levels have in general been low as has the herd SCC. Youngstock has been reared well resulting that heifers calve on average at 23 months of age and join the milking herd without many issues.

**Maarten Boers**  
**The Livestock Partnership Ltd**

## **Herd Age**

There are 95 milking heifers, 68 second, 41 third, 28 fourth, 20 fifth plus calves which demonstrates the longevity of the herd.

## **Calving Pattern**

The herd is all year round calving with the following pattern:

May-June (30), July-August (53), October-November (24), December (20),  
January-February (40), March-April (58)

## **Herd Average**

The herd is NMR recorded with the following excellent herd average :

10,818Kgs 4.02%BF 3.35%P cc173

The latest Bulk Tank test result (01.09.24) is **4.56%BF 3.38%P cc134**

The herd has exceptional fertility with the following impressive stats:

**Average days in milk - 154**  
**1st service conception – 45%**  
**In Calf at 100days – 70%**

## **Herd Health**

The herd is BVD CheCS accredited BVD free. IBR has always been monitored negative and the herd was Lepto vaccinated in the Spring. The herd is monitored regularly for Johnes with an extremely low prevalence.

## **Auctioneers Comment**

This is an exceptional herd of Cows which have been extremely well managed and cared for. The Cows are medium sized and well balanced with cracking udders, legs & feet. We highly recommend attendance to this very genuine dispersal sale.
