Foreword

Kivells are delighted to have received instructions to disperse the entire Dairy herd of 534 NMR recorded Holstein Friesians on behalf of Steanbow Ltd.

Neil has milked and managed the dairy herd at Park Dairy, Steanbow Farm since returning home in 1990 alongside his brother Mike who has managed the forage and land use.

Awards include finalist of Farmers Weekly Dairy farmer of the year in 2012.

The herd lives in the centre of Glastonbury Festival so competes with land use for this annual event. The herd has been fully housed since 2006 and this has driven the production system to a high welfare housed system.

We have always strived for absolute first-class management to ensure that cows are cared for to the highest standards. Within this system cows are milked 3x daily in two GEA 24:24 parlours, sitting side by side. These will be available for sale after the herd sale.

Milk is collected daily from a 30,000lt Fabdec bulk tank, also for sale after the herd sale. Contracted to Muller for processing with the added bonus of a Sainsbury's aligned price structure and the added requirements this demands on records, health and welfare monitoring of the cows. We aim to achieve a level calving and production profile for our customers.

We believe the health and welfare of the cows is given absolute priority. Cows are all Cubicle housed in deep sand beds with a straw yard for fresh calved cows. A weekly vet with Charlie Neale of Shepton Vets takes place to cover all required health and fertility needs.

Management and Feeding

The cows are fed a full TMR consisting of maize and grass silages, chopped straw and a blend of soya and rape and home grown soda wheat. Nutritionist, Robbie Taylor, visits the farm every month and monitors and evaluates and make amends if necessary. Target is to utilise as much home grown food as possible with only necessary proteins bought in.

The cows are managed on a flying herd basis with replacement heifers bought in, either fresh or in calf, all sourced through Dan and Helen Newman. A lot of the herd has been sourced from Europe, France, Germany and Denmark. However blue tongue has restricted this of late and high-quality heifers have been sourced from England.

All cows are inseminated using British Blue and Aberdeen Angus, with some AA sexed too. Genus perform their full RMS service with some excellent results of a pregnancy rate of 28 and insemination rate of 73. Current calving interval is 380 days.

The decision to disperse the entire Steanbow Park Dairy herd has not been an easy choice but one with clarity on the future and family succession with the need to simplify a diverse mixed farming business.

We have the benefit from the added business activities of other farming enterprises, operations and diversifications to allow the continued success of this family run farm.

The outstanding results would not be possible without the hard work and dedication of the whole Steanbow Farm team, so we would like to say thanks to them all and to wish the few a bright and pleasant future in their new lives away from Steanbow.

We wholeheartedly wish all vendors continued success from these absolutely outstanding cows and their bright futures.

Thank you

Neil and Michael Christensen

NMR Herd Average

The herd is recorded through NMR every month and Uniform maintains all herd records and the milking parlours produce daily milk yields.

Currently averaging **38lt/day at 3.8% BF and 3.2% Pr. cc170**, with a herd yield approaching 12,000/cow.

Herd Age

There are 130 milking heifers, 188 second, 110 third, 57 fourth, 61 fifth plus calvers which demonstrates the longevity of the herd.

Calving Pattern

The herd is all year-round calving with the following pattern:

May-June (79), July-August (83), September-October (74), November-December (79), January-February (90) & March-April (50).

Herd Health

The herd is foot trimmed every 4 months by the team at Steve Paul Cowsfeet and the Cows are footbathed daily. During this event the cows are vaccinated for annual BVD, Lepto and IBR, tails are also trimmed. Any subsequent lameness cases are immediately treated by farm staff. Lameness is simply not tolerated and aim to achieve herd mobility of 5% score 2 and zero score 3. Cows are monitored quarterly for Johnes disease. Cows are dried off using selective dry cow therapy of Orbenin and Orbeseal teat sealant.

Auctioneers Comments

This is an outstanding herd of very milky Cows which will suit any system. There is an abundance of Cows at full profit or close to as well as many Cows that will calve throughout the rest of the year and into the spring. The Sale offers a huge choice and every effort should be made to attend this On Farm Sale.
